

# XXL-Rehab Simulation Suit

Put yourself in the shoes of a bariatric patient

The XXL-Rehab Simulation Suit is made to offer better understanding and learning of the abilities of a bariatric patient.

When you put on the suit, you obtain a wide view of the mobility patterns, the restricted movement of the body and other issues related to a bariatric user that you never thought of before!

This gives a higher level of knowledge for staff who handle bariatric users and can help to improve their cooperation with bariatric users.

The XXL-Rehab Simulation Suit is particularly useful in connection with seminars dealing with transfer and knowledge sharing within the health sector.

The XXL-Rehab Simulation Suit comes with clothes and a carry bag.
